## TECHNICAL PROJECTS

### Recipe Finder App - [Frontend Code](#) | [Backend Code](#) | [Demo](#)

*Explore recipes to cook for your next meal*

- + Web App: Built with React and Ruby on Rails
- + Generated responsive view using React keystroke listeners in search bar and pagination
- + Implemented JWT library to authorize and authenticate user login on frontend and backend
- + Employed external API to provide information about recipes, ingredients, pictures and URL for website of recipe

### Event Finder App - [Github Code](#) | [Demo](#)

*View upcoming events in Georgia*

- + Web App: Built with HTML, CSS, Javascript and Ruby on Rails
- + Fetched data from TicketMaster API to display event information
- + Implemented filter functionality to allow user to filter events by location
- + Persisted user's saved events in backend database using Ruby on Rails and PostgreSQL
- + Used Semantic UI and custom CSS to design interface

### Build a Monster App - [Github Code](#) | [Demo](#)

*Create monsters from parts, edit them, delete them of your choice and view their stats*

- + Built Frontend and Backend with Ruby on Rails
- + Applied RESTful conventions and full CRUD operations with models, views and controllers
- + Utilized Ruby's ERB templating system to render pages with variable substitution and flow control
- + Incorporated Active Record validations to ensure an error-free process of monster creation
- + Formulated algorithms to seed database using dummy library for names and random body part assignments

## TECHNICAL SKILLS

- + Ruby/Rails, JavaScript, React, Java, HTML5, CSS3, SQL, Git/Github, jQuery, Bootstrap/SemanticUI, JSON/API

## EMPLOYMENT HISTORY

### Moose Creative Media, Norcross, GA
